

Motorised Floor Sweeper

ABSTRACT

5

A motorised floor sweeper includes a chassis, a pair of  
elongate brushes mounted to the chassis in parallel  
relationship with one another, two electric motors  
mounted to the chassis and causing counter-rotation of  
10 one of the brushes with respect to the other brush, and a  
dust compartment adjacent to at least one of the brushes  
for receiving dust swept up by the brush.
